

# INFRASTRUCTURE SERVICES

Whether or not you use the TT® platform, leverage our low-latency global financial network and expert operations team.

## INFRASTRUCTURE-AS-A-SERVICE (IaaS)

Focus on your business and let our team procure, host and monitor your infrastructure.

### EXPERTISE

We have more than 20 years of experience designing networks, hosting infrastructure, and deploying and managing trading applications.

### GLOBAL NETWORK

Our network is designed with the performance and high-availability demands of professional traders.

### MARKET ACCESS

With our collocated data centers, we provide high-performance market data and order routing to each TT connected exchange.

### FLEXIBILITY

We provide various levels of hosting, with several server options to suit your needs.

### COST EFFECTIVE

Our range of service offerings provides a low barrier to entry for anyone wanting to deploy software.

### HIGHLIGHTS

- ◆ Gain access to a worldwide financial ecosystem and address your infrastructure needs.
- ◆ Reduce vendor sprawl, solution complexity, time to market, investment and risk.
- ◆ Try new markets without a huge investment or long-term commitment.
- ◆ Provide regional access to your customers around the world.
- ◆ Synchronize your PTP time service with TT-hosted infrastructure PTP services.

## HOSTED COMPUTE

We provide a leased server with bootstrapped operating system and configuration to the IaaS network.

## NETWORK SERVICES

Connect your applications around the globe.

### ◆ INTER-DATA-CENTER CONNECTIVITY

Private customer bandwidth interconnecting customer networks between data centers.

### ◆ INTERNET ACCESS

Internet access is available from the customer's network in every data center.

### ◆ ECOSYSTEM CONNECTIVITY

Connect to other market participants and systems via dedicated cross connects, financial extranet services or internet.

## EXCHANGE SERVICES

Consume live prices and route orders to all exchange environments supported by TT.

### ◆ RAW EXCHANGE MARKET DATA

Develop directly to the raw price feeds that exchanges provide for the lowest possible latency.

### ◆ ORDER ROUTING ACCESS

Use our existing low-latency exchange connectivity to route orders from your proprietary or third-party applications.

### ◆ EXCHANGE DROP COPY FEEDS

Pull execution reports directly from exchanges into your risk, middle and back office applications.

## TT PLATFORM INTEGRATION

Create optimal solutions by combining aspects of the TT platform with proprietary and third-party applications.

### LOW-LATENCY ACCESS

Reduce solution complexity, improve resiliency and eliminate unnecessary latency by minimizing system integration points. Leverage our low-latency APIs—Core SDK, .NET SDK, FIX and TT Strategy Studio—to build your trading strategies.

### NORMALIZATION

Streamline your development with normalized prices and orders through the use of our APIs and FIX Services.

### RISK AND COMPLIANCE

Access and view post-trade data from multiple systems all in one place for a global view of risk.
