

LADENBURG THALMANN & CO INC ("LTCO") may receive payments for placing non-marketable limit orders ("posting liquidity") on ECN's or Exchanges that are ultimately executed. Typically, however, such payments are significantly lower than the fees paid to such venues for "taking liquidity," so any payments simply serve to offset some of the transaction fees that would otherwise be incurred. The source and amount of any compensation received in connection with a specific transaction and any additional information concerning order flow payment, including both held and not-held order flow will be disclosed upon written request.

LTCO may internalize customer order flow to offer opportunities for price improvement. The internalization of customer order flow may provide lower costs and revenue opportunities to **LTCO** that otherwise may not have been available had the order flow been routed to another market center, market participant, dealer, or exchange.
